PROFESSIONAL SUMMARY

Frontend-oriented Fullstack Developer with experience building and deploying scalable web applications using React, TypeScript, and Node.js. Strong in UI/UX implementation, frontend architecture, performance optimization, and clean, maintainable code within Agile development environments.

TECHNICAL SKILLS

Frontend: React.js, TypeScript, JavaScript (ES6+), RTK Query , Tailwind CSS, Redux, HTML5/CSS3, Responsive Design, React Native

Backend: Node.js, Express.js, RESTful API, MongoDB, PayOS Integration, Socket.io, JWT Authentication

DevOps & Tools: Git/GitHub, Vercel, Docker (basic)

Testing: Unit Test, Integration Test, User Acceptance Test (UAT)

Other: API documentation, Postman, Figma, Agile workflow

SOFT SKILLS

- Analytical & System Thinking
- Problem Solving & Debugging Mindset
- Time Management in Agile Environment
- Team Leadership & Mentoring

PROFESSIONAL EXPERIENCE

Frontend Developer Intern

Amazing Tech | Jan 2024 – Apr 2024

- Developed 15+ reusable React components for customer dashboard, accelerating frontend development velocity by 25%
- Reduced production error rate by 30% through resolving 20+ bugs in authentication flows, form validation, and API integration
- Participated in agile workflow with code reviews from 3 senior developers, implementing component architecture and state management best practices
- Collaborated in daily standups and bi-weekly sprint planning, consistently meeting deadlines for feature deliveries

FEATURED PROJECTS

- Travelbooking Website

Frontend Development | Team of 5 Developers | 2024 | [GitHub](#)

Tech Stack: React.js, Tailwind CSS, RESTful API, PayOS

- Developed hotel booking platform supporting 3 user roles and 10+ core features.
- Processed online payments with PayOS, handling 500+ test transactions.
- Designed PostgreSQL schema with 12+ tables for booking and user management.
- Improved page load performance by ~30% via component optimization.

- **School Medical Management System (SMMS)**

Team Lead, Fullstack Development | Team of 5 Developers | 2025 | [GitHub](#)

Tech Stack: React.js, RESTful API, Node.js, Express, Tailwind CSS, PostgreSQL

- Led a team of 5 developers delivering a medical record system for 1 school unit.
- Designed system architecture and database schema with 15+ entities.
- Implemented RBAC for 3 roles: Admin, Nurse, Guardian.
- Reduced manual medical record handling by 60% - 70%.

- **CoMS – Contract Management**

Capstone Project (Real-world Business Solution) | Frontend Development | Team of 4 Developers | 2025

Tech Stack: React.js, Tailwind CSS, Socket.io, Redux, RTK Query, React Native

- Built an enterprise contract management system covering 6+ core contract workflows.
- Reduced manual contract processing time by ~40% through digitalized approval flows.
- Implemented RBAC with 5 user roles using JWT authentication.
- Developed real-time notification system handling 1,000+ contract events/month.

EDUCATION

Bachelor of Software Engineering: FPT University Ho Chi Minh | 2021 – 2025

GPA: 3.0 / 4.0

Relevant Coursework: Data Structures & Algorithms, Database Management, Web Development, Software Engineering

ADDITIONAL INFORMATION

Languages: Vietnamese (Native), English (working proficiency)
